The main purpose of taking industrial training is to expand knowledge and to know how to solve practical problems. For this I have selected MARUTI SUZUKI Atul Motors Pvt. Ltd. The objective of industrial training is mainly based on rectifying errors change parts or replacement of parts and arrange them by which they can give a best output of it. In service centre I had understood how to solve a problem of customers and try to fulfill the demand of customer. It would also be helpful in using the knowledge which I had studies in different reference books. Whatever I had read in book, I had come to know that there were many more things which give me more knowledge. In inner part of service centre it has a huge space for different services like Major Repair and Minor Repair. I have get training for 4 months & 14 days, it is my amazing experience in which I have understood many practical things, show many new Instruments and Equipments, new technology of cars, different qualities of cars, different types of services, different tools used in different problems. My knowledge is increase to that much even I know the Servicing Procedure. How to decide a Major or Minor Repair. I also know the Periodic Maintenance Schedule of Maruti Suzuki cars. I learnt many things. The workers of service centre help me a lot and give me a guidance. And I am sure it will helpful in my future.
I would like to convey my gratefulness to staff of Diploma Automobile Department and staff of ATMIYA INSTITUTE OF TECHNOLOGY & SCIENCE FOR DIPLOMA STUDIES for the excellent Industrial Training which I have undergone in ATUL MOTORS PVT.LTD. The skills and knowledge which I have gained throughout my practical training I perceive as very valuable component in my future career development. As you know this Industrial Training was part of my educational curriculum and therefore I have to thank you for providing me this opportunity.

I would especially like to thank Mr. DANSINGH CHAUHAN for their generous support, coaching and companionship during my training period. I shared their expertise with me very generously and I have learned a lot from them. My thanks and appreciation to Mr. P.K. JOSHI for willing to help us, and above all to your good companionship.

Thank you once again for your great support in the successful completion of my Industrial Training.
