ACKNOWLEDGEMENT

We have taken many efforts in this project. However, it would not have been possible without the kind support and help of many individuals and organizations. We would like to extend our sincere thanks to all of them.

We are highly indebted to **Prof. Piyush Kashiyan** for their guidance and constant supervision as well as for providing necessary information regarding the Major Project titled “**FASHION STREET**”. We would like to express our gratitude towards staff members of Information Technology Department, Atmiya University for their kind co- operation and encouragement which helped us in completion of this project.

We even thank and appreciate to our colleague in developing the project and people who have willingly helped us out with their abilities.

ABSTRACT

This project goal is to providing an easy way for students who wants to give the test and check their skills and knowledge. The project “Fashion Street” is developed in PHP as front end and MYSQL as a back end.The Solution has been deployed, tested and validated thoroughly. While designing the system, care has been taken in efficiency, maintenance and reusability of the software for present and future changes in the system.

1.PROJECT PROFILE

Developed by : - Sojitra Darshika
Sorathiya Mansi

Project Title : - FISHON STREET

Project Language :- Front_End : php
Back_End : MYSQL

Year : - 2022 - 23

Operating System : - Windows 7 Up To Windows 10

Web Browser : - Google Chrome & etc

Submitted to : - Atmiya University

2. PURPOSE OF PROJECT

The aim of this project is to gather and analyze and give an in-depth insight of the complete problem by defining the problem statement in detail. It also concentrates on the capabilities required by stakeholders and their needs while defining high-level product factors.

Product is directly delivered to the customer's home. It provides Ebay services of EBAY through the internet. An online shop, e-shopping, e-store, internet shop, web goods to its consumers. Shopping will be highly personalized and the mall will provide lower prices than most competitors.

The website must have the ability to add categories and products and update information of each product. Also want to have a backup system for the database and have two reports from customers.

Customers must have a recognized registration page for buying, selling and login. The product must be searched by name and categories, adding products to the name shopping basket for check out and register order.

3.CURRENT SYSTEM ANALYSIS

3.1 STUDY OF CURRENT SYSTEM:-

We have to find out that many problems arise in the old system so me and my partner decide to make a new project with many facilities. We have to search one by one section....

The investigation is needed to prepare a new system of computerization.

The “FASHION STREET” can contain different types of clothes at one place and give comfort to their homes. This has affected offline retail companies to stay in the competition with other retailers and online stores.

- ❖ Objectives need a new system.
- ❖ problem or weakness in the manual system.
- ❖ Method to store the records in the manual system.
- ❖ It is time consuming.
- ❖ Bring friends for a shopping-oriented customer loyalty model.

3.2 PROBLEM & WEAKNESS OF CURRENT SYSTEM:-

Problems and weaknesses are...

- ❖ Delay in delivery.
- ❖ Lack of significant discounts in online shops.
- ❖ Any type of feedback system is not available.
- ❖ Lack of interactivity in online shopping.

4.SCOPE OF NEW SYSTEM

- Purchasing and selling products and services over the internet without the need of going physically to the market.
- It gives the information of products, pictures comparisons, price and much more, like AMAZONE.COM, EBAY.COM, FRAMT.COM.
- Online shopping makes use of digital technology for meaning the flow of information, products, and payment between consumers, site owners and suppliers.
- It can be either BUSINESS TO BUSINESS OR BUSINESS TO CUSTOMER. It can also provide 100% satisfaction to the consumer.

5.SYSTEM ANALYSIS

5.1 Information Gathering

Q1. What are the marketing strategies you are implementing for promoting your mall?

Ans. Through social media they are promoting their mall.

Q2. What are the payment methods?

Ans. payment methods like cash, Paytm, credit.

Q3.how is the billing system? (with GST OR without GST)

Ans. The billing system is with GST.

Q4. How can you manage your stock?

Ans. They manage their stock monthly.

Q5. Do you have a warehouse?

Ans. Yes, they have a warehouse.

Q6. How do you maintain your accounts?

Ans. They maintain their accounts by Tally.

Q7.who are your suppliers from which state?

Ans. from Mumbai.

Q8.how do you give new offers to consumers?

Ans. By advertisement & news

Q9.how do you stay in contact with your consumer?

Ans. By email.

5.2 Feasibility Study

1) Technical feasibility

- **Hardware requirement**

CPU – Intel core i-3 3300 CPU (a) 3.40GHZ

RAM – 4.00GB

- **Software requirements**

Browser –Mozilla, chrome & etc

PHP

- **Network requirements**

Internet Connection

2) Economic feasibility

Hard disk drive

GB -256

Price -3560

Random access memory

GB – 4

Price – 2960

DDR – 3

Operating System

Window 7,8,10

Price: - 5500

Ultimate: - 64

3) Operational feasibility

Website will be user friendly and easy to access operationally.

8. TESTING

| Test case ID | Test Objective | Precondition | Steps: | Test data | Expected result | Postcondition |
|--------------|---|---|---|-------------------------------|--|--|
| Test case -1 | login page Successful User login to website. Check the screenshot to get an idea of what screen we are testing | 1. A valid User account to login to be available 2. home page is launched on a browser | 1. In the login Panel, enter the username | user name is not valid | The user is logged in successfully. If valid user get login success if not then process not to be corrected. user can't operate next page. | For first time users would be some leag because of cookie. Note: This info is only additional. Just as a pointer to the tester |
| | | | 2. Enter the Password for the home page in the password field | password is not valid | | |
| | | | 3. Click "Login" button | | | |
| Test case -2 | launching product page. | 1. select the product you want to buy. | 1. login for see your previous orders. 2. Once you land on product page. Then just click on product which you like to order. | A valid offers. | If user proper process then order is successfull y placed. | Skip this process then can't give any orders. |

| | | | | | | |
|--------------|--|---|---|--|--|--|
| | | | | | | |
| Test case -3 | Launching the news and advertise page. | 1. Product and offer and news and advertise of product is | 1. Click the product which you want to order. | "A valid value for that particular product is retrieving | 1. Specific product details are specified on one page. | |

| | | | | | | |
|--|--|--|--|--|--|--|
| | | <p>launched on a compatible browser and a User account holder is logged in to the site</p> <p>(The precondition can be used to avoid repeating steps 1, 2 and 3 as in the previous test case. However, if you are more comfortable having the login</p> | | | | |
|--|--|--|--|--|--|--|

| | | | | | | |
|---------------------|--|---|--|--|--|--|
| | | steps as well, that is ok too.) | | | | |
| Test case -4 | Getting bills and completing the order. | Once user gave the order then bill page is appeared of the specific user then order is successfull y placed. | Click on confirm after the order. | A valid amount of data retrieved for the particular user. | The page appears with result of | If the user is register ed user then user can buy the product s. For confirm of buying. |

9. MAINTENANCE

- 1. Our “FASHION STREET” project maintains insert, update, delete category, feedback, Email system, etc.**
- 2. Our website can maintain a fully security provided client, users can not enter without password & E-mail.**
- 3. We can maintain all types of privacy, and so on.**

10. LIMITATION AND FEATURES FOR FUTURE

LIMITATION

- 1. This website is online on web.**
- 2. We have no wish list facility.**
- 3. We can make payment only in cash on delivery.**

FUTURE ENHANCEMENT

- We will make it more user-friendly in future.**
- We will solve some errors and bugs from our websites.**
- We will add more features on site.**
- We will also provide some advanced facilities in the near future.**

11. CONCLUSION

No project can be termed as 'perfect' in real sense and there always remains scope for future improvement and so that helps to develop a new version of the software. We are always eager to know some new points and validation related to projects which give us more knowledge and help us to create new version.

The "FASHION STREET" system has been developed by me and also done enhancement in application through applying our knowledge gained in class room, referring to certain books, browsing some sites and through the help of external and internal faculties and using our knowledge related to subject it.

I am very thankful to the project guide and organization staffs that extended all their support and helped us complete this project successfully.
